rescuebox-2.0

Sunday, May 25, 2025   1:01 PM

start rescuebox API server

https://github.com/UMass-Rescue/RescueBox/wiki/Onboarding

poetry run python -m src.rb-api.rb.api.main

```
2025-05-25 13:06:04,478 [DEBUG] asyncio: Using selector: SelectSelector
INFO:     Started server process [7016]
INFO:     Waiting for application startup.
INFO:     Application startup complete.
```
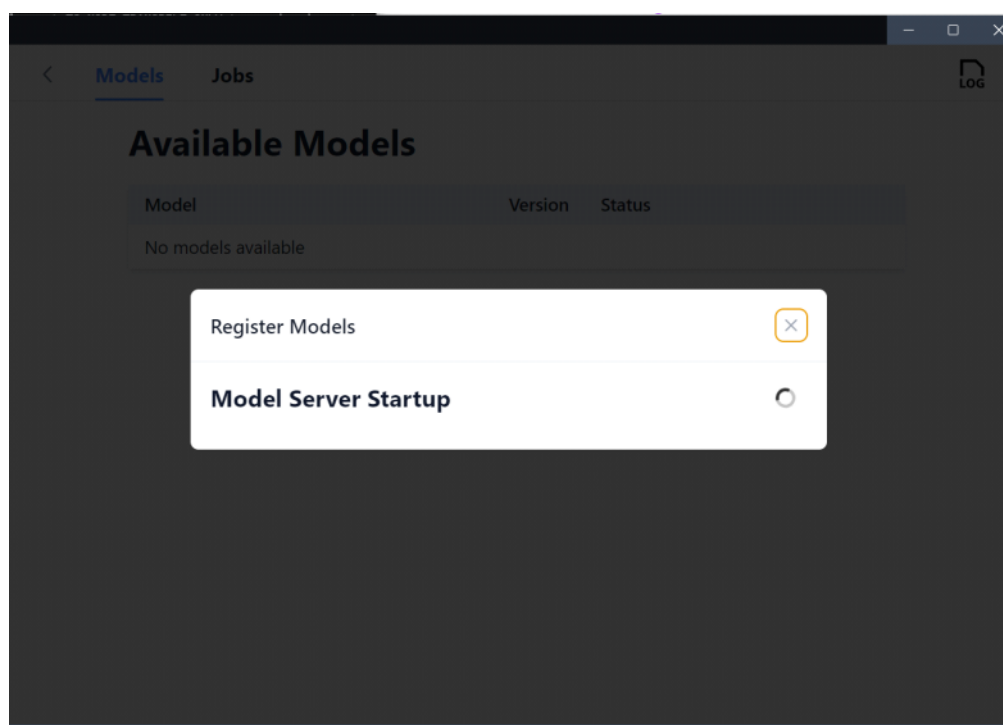

start the desktop https://github.com/UMass-Rescue/RescueBox/blob/main/RescueBox-Desktop/README.md
developer mode
or
double click on rescuebox desktop icon after installation.

see output on rescuebox API server window for api calls to plugin :

the Desktop is in a loop trying to connect to server on port 8000

After the models are discovered and auto-registered, see this list.

this screen shot occurs if model server is not running , however the models have been registered (the unavailable models list can be seen in the background) . make sure server is running on localhost port 8000.
